

[Listen: USCIS Deputy CISO and Chief Cybersecurity Architect Adrian Monza](#)

Season: 3

| Episode: 1

Monza discusses the strategy behind securing endpoints, users and data by getting rid of passwords and running anti-phishing exercises.

Tue, 03/03/2020 - 15:22

Adrian Monza, U.S. Citizenship and Immigration Services Deputy Chief Information Security Officer, discusses the strategy behind securing endpoints, users and data by getting rid of passwords and running anti-phishing exercises. He also talks about penetration testing, containerization and the importance of educating your entire organization about their role in cybersecurity.
